

TABLE OF CONTENTS

Biography	5	Brake Force and Corner Weight	37
Acknowledgments	5	Perfect Balance	38
Dedication	6	Static Weight Distribution	39
Foreword	6	The Second Law of Motion	39
Introduction	7	Dynamic Weight Distribution	40
Chapter 1: Energy Conversion	9	The Benefits of Perfect Balance	41
The Conservation of Energy	9	Front Brake Bias	43
Where Energy Comes From	10	Rear Brake Bias	43
Friction	10	Measuring Brake Balance	44
Kinetic Energy	11	Changing Brake Balance	44
Potential Energy	13	Chapter 5: Pedals, Boosters	
Energy Transformation	14	and Master Cylinders	46
Energy and the Brake System	14	Brake Pedal Components	46
Calculating Brake System Temperature	15	OEM Brake Pedals	47
Importance of Brake Sizing	15	Racing Brake Pedals	48
Chapter 2: Tires Stop the Car	18	Brake Boosters	48
The First Law of Motion	18	Vacuum Boosters	48
Brake Forces	18	Hydraulic Boosters	50
Tire Slip	19	Master Cylinders	50
How Brake Forces are Generated	20	Master Cylinder Selection	52
The Mu-Slip Curve	22	Rear Brake Pressure Reduction	54
Choosing the Best Tires	24	Balance Bars	54
Calculating Maximum Deceleration	25	Proportioning Valves	55
Chapter 3: Brake System Design	27	Chapter 6: Brake Fluid	58
Driver Applied Force	27	Brake Fluid 101	58
Brake System Overview	28	FMVSS116	58
Brake Corner Gain	33	Dry Boiling Point	60
Summing Forces	34	Wet Boiling Point	61
Overall Brake System Gain	34	Water Adsorption	61
Calculating Deceleration	34	DOT Ratings	61
Calculating Stopping Distance	34	Brake Fluid Compatibility	64
Brake System Modifications	35	Brake Fluid Maintenance	64
Chapter 4: Brake Balance	37	Brake Bleeding	65
		Chapter 7: Brake Lines and Hoses	69

TABLE OF CONTENTS

Hydraulic Circuit Design	69		
Brake Lines	70		
Flare Fittings	70		
Brake Hoses	71		
Banjo Fittings	72		
Stainless Steel Brake Hoses	73		
Chapter 8: Brake Calipers	76	Chapter 11: Sports Car Brake Upgrade	118
Hydraulic Gain	76	The Vehicle	119
Caliper Components	76	The Objective	119
Taper Wear	79	Picking the Right Parts	119
Piston Count	81	Bolting Them On	121
Caliper Mounting	82	The Results	124
One-Piece (Monoblock) Calipers	84		
Two-Piece Calipers	84	Chapter 12: Racecar Brake Upgrade	126
Knockback	84	The Vehicle	127
		The Objective	127
Chapter 9: Brake Pads	88	Front Brake Upgrade	127
Brake Pad Terminology	88	Rear Brake Upgrade	129
Coefficient of Friction	90	Apply System Upgrade	131
Coefficient of Friction Stability	91	Hoses, Fluids, and Pads	132
Brake Pad Fade	91	The Results	132
Friction Material Categories	92		
Friction Material Chemistries	93	Chapter 13: Muscle Car Brake Upgrade	133
Friction Mechanisms	96	The Vehicle	133
Brake System Break-In	97	The Objective	134
		Drum Brakes 101	134
Chapter 10: Brake Rotors	100	Picking The Right Parts	134
A Rotor Refresher	100	Bolting Them On	135
Rotor Terminology	101	Buttoning it Up	138
Effective Radius	103	The Results	138
Rotor Sizing	103		
Static Weight and Rotational Inertia	103	Chapter 14: Hot Rod Brake Upgrade	139
Rotor Cooling	104	The Vehicle	139
One-Piece (Fixed) Rotors	107	The Objective	139
Two-Piece (Floating) Rotors	107	Front Brake Upgrade	139
Solid Rotors	109	Brake Pedal Considerations	140
Vented Rotors	110	Master Cylinder Upgrade	142
Cross-Drilled Rotors	111	Brake Line and Proportioning	
Slotted Rotors	112	Valve Installation	142
Rotor Inspection	113	Brake Hoses	143
Thickness Variation	115	Brake Fluid Selection	143
		Parking Brake Installation	144
		The Results	144
